Hurricane Matthew Recovery Efforts, United States East Coast

Emergency Management Assistance Compact (EMAC)

- California deployed a 2-person EMAC A-Team (also known as an EMAC “Advance” Team), for a two week deployment to support Florida’s State Emergency Operations Center. Cal OES Mission Tasking Number 2016-SOC-27164. The team was instrumental in coordinating response resources from other states and assisting Florida in other areas as needed. Florida has now transitioned from response to the recovery, [and the A-team members arrived safely back to California on 10/12/16.](#)

FEMA US&R

- The Urban Search and Rescue (US&R) Blue Incident Support Team (IST) has been activated in support of Hurricane Matthew.
- 19 California Task Force (TF) members were deployed: (1) TF 1; (1) TF 2; (3) TF3; (5) TF5; (1) TF 6; (2) TF7; and (6) TF8. Cal OES Mission Tasking Number 2016-FIRE-27170.

SITUATION SUMMARY

California Department of Public Health Zika Virus and Meningococcal Disease Update

The Medical and Health Coordination Center (MHCC) continues to be activated in response to the Zika Virus Disease and Meningococcal Disease Outbreak. This situation report reflects only Zika Virus activities. The next Meningococcal Disease Outbreak Situation Report will be distributed on 10/13/16. The California Department of Public Health (CDPH) and Emergency Medical Services Authority (EMSA) are currently the only Emergency Function 08 (EF 08) partners at the state level reporting on this activation.

- The MHCC is coordinating with EF 08 partners, healthcare facilities and local health departments (LHDs) to ensure responses are timely and accurate.
- CDPH and EMSA Duty Officer Programs are monitoring the Zika virus disease outbreak after hours and remain in communication with the Regional Disaster Medical and Health Coordination (RDMHC) Programs and the Medical Health Operational Area Coordinator (MHOAC) Programs throughout California.

Zika Virus

- As of Friday, 10/07/16 there have been 328 travel-associated Zika virus infections in California.
- This number is an increase from 302 cases reported in the last operational period.
- CDPH centers and programs continue to monitor Zika virus disease and provide information to the MHCC related to their specific activities on a weekly basis.

WEATHER OF CONCERN

Weather of Concern

- Stormy weather will impact portions of Northern California and Southern California through Monday. Two primary waves are expected and will be water and wind related. Periods of heavy precipitation may lead to widespread urban and localized flooding making travel more dangerous.
- The Sacramento Weather area of responsibility, which includes burn scar areas in Lake, Yolo, Butte, El Dorado, Calaveras and Amador counties, advises that the upcoming weather event is not anticipated to produce precipitation rates, over the burn scar areas, which will exceed the debris flow criteria that has been established by the National Weather Service.

WEATHER SYNOPSIS BY REGION

NORTHERN CALIFORNIA

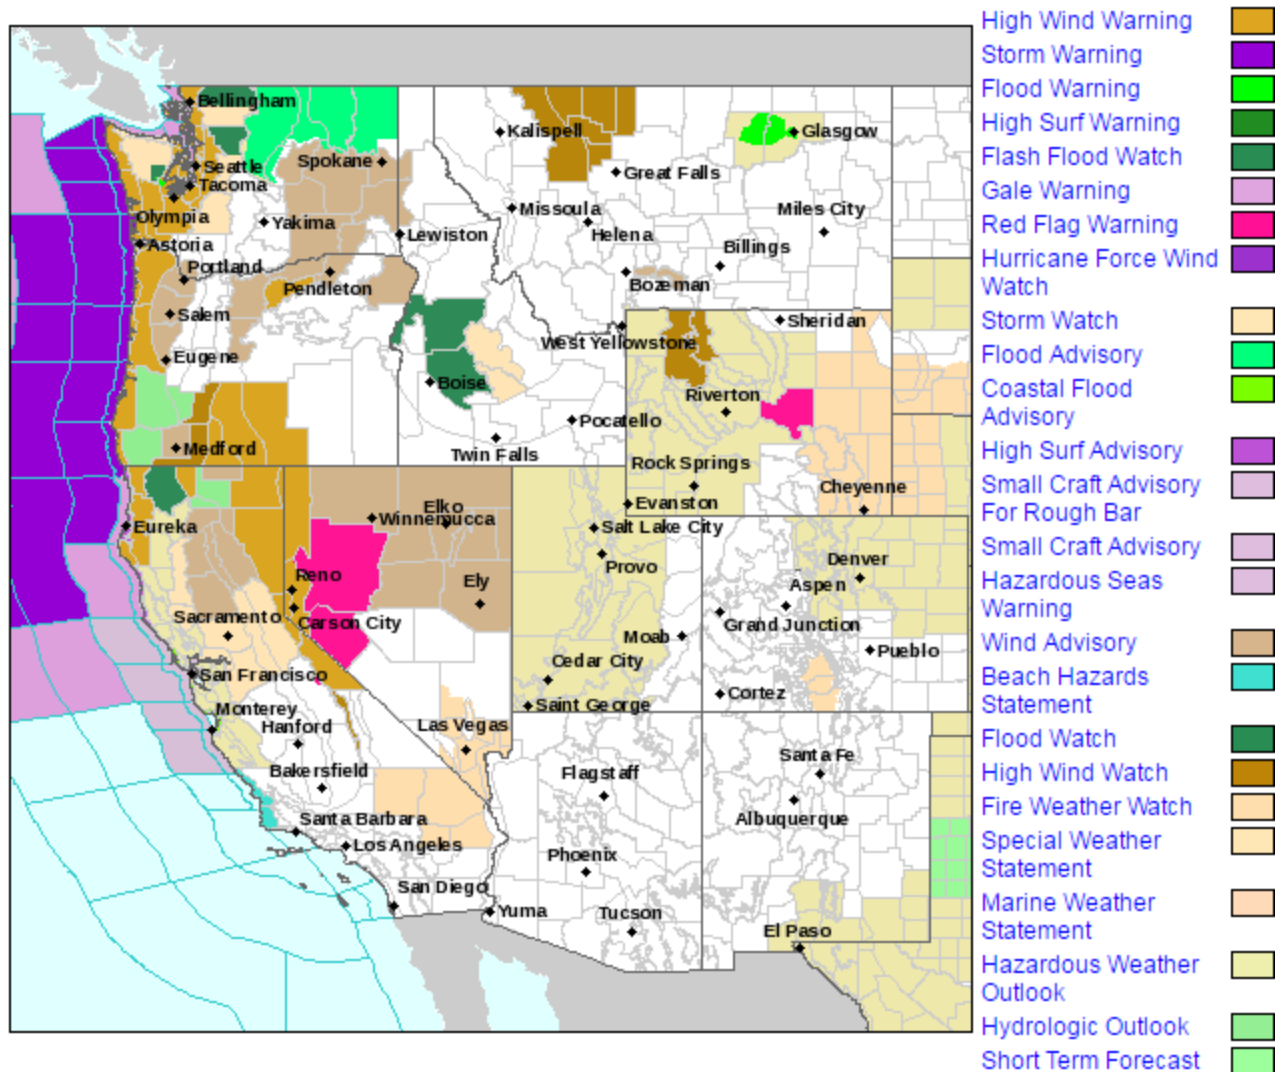

The advertised major change in weather pattern for the region is underway this morning. Precipitation in the northwestern coast area will gradually spread inland as the day progresses. Strong southerly winds are also developing across the region as expected. Later this afternoon fairly widespread wind speeds of 12-22 mph with gusts 30-45 will be in place and locally stronger, especially in the higher terrain. Heavier rain will spread across the region later this afternoon and overnight. Friday precipitation will become more showery with a few (very wet) thunderstorms possible. What looks like an even stronger weather system is expected to roll across the region Saturday with stronger southerly winds and heavy precipitation in more areas. Most locations will probably see wind speeds of 15-25 mph with gusts 35-55 mph develop Saturday with stronger values in the higher elevations. If soils become saturated, trees may become susceptible to being blown over. Showers and rain will linger Sunday and showers will be in the north Monday. Things begin to dry out Tuesday and high pressure will become rather strong the rest of next week with a marked warming and drying trend expected. Unseasonably cool temperatures will last into next week with our warmest areas dropping into the lower and mid 60s this weekend before that warming returns next week.

SOUTHERN CALIFORNIA

A weak ridge will redevelop over the area today, resulting in very light winds and slightly warmer conditions. Expect temperatures to reach the upper 60s in the mountains and at the coast to the upper 70s to lower 80s in the valleys. After today, three storm systems are expected to bring periods of heavy rain to Northern California Friday into the weekend. The first storm, which is the strongest one, will reach the northern part of the state Friday morning and bands of rain will sink southward into the northern part of the Geographic Area Friday afternoon. Most of the precipitation will remain north of the area, but a half to three quarters of an inch of rainfall will be possible in Monterey County and in Yosemite National Park. A trace to a quarter of an inch may fall in San Luis Obispo County and the Sierras north of Fresno County. Drizzle or light showers may bring trace amounts further south. The snow level will remain above 7,000 feet. Strong west winds of 20-30 with gusts to 65 mph will be possible Friday in the Sierra high country eastward into Mono County and the Inyo National Forest. Wind gusts to 40 mph will also be possible from the Antelope Valley eastward into the Mojave Desert Friday. Precipitation will end Friday night and partly to mostly sunny skies and seasonally cool weather can be expected Saturday. The second system will bring half as much rainfall as the first system Saturday night. Similar amounts can be expected from the final system Sunday night into Monday morning. It will remain quite windy in the Sierras and desert throughout the weekend. Monday and Tuesday, expect gusty north winds across Santa Barbara County and the I-5 Corridor as the trough heads into the Great Basin. Winds are expected to switch around to the northeast Tuesday night into Wednesday. Offshore winds may continue into the second half of next week, resulting in much warmer weather for Southern California. Highs will likely be in the 90s with minimum RH in the single digits and teens across much of Southern California during the second half of next week.
